

60 Litre Water Cart with Electronic Pump

A light weight and portable Water Cart with an electric pump, powered by an onboard rechargeable battery, is a convenient method to quickly and easily water your forklift lead acid battery.

Easy to use:

- Connect to your batteries Single Point Watering System with included hose and coupler
- Switch on the pump and water will flow into your battery until the floats shut off the flow
- Switch off the pump, disconnect the coupler and wheel the Water Cart away

Water Tank

- 60 Litre Capacity
- 71mm opening for quick refilling
- Integrated pump and battery housing
- Splash proof charge point

Trolley

- Powder Coated Metal Trolley
- 125mm Solid Rubber Wheels

Battery & Charger

- Fast charging thanks to Lithium technology
- On board 10.8 Volt 6.7 Amp Hour Lithium Battery
- 12.6 Volt 1 Amp Charger with 240V Plug

Water Pump

- 12 Volt 2.1 Amp Comet 'Elegant' Pump made in Germany
- Flow rate: 10 litres per minute

Run Time

- The water pump draws 2.1 Amps and the Lithium Ion battery pack is 6.7 Amp Hours, therefore the pump can operate continuously for $6.7 / 2.1 = 3.2$ hours.
- The pump is rated at 10 litres per minute, therefore $3.2 \times 60 \times 10 = 1,920$ litres, i.e. 32 x 60 litre tanks (nearly 2 tonnes of water) from a single charge.

Water Connection

- Includes hose and Push / Pull quick release Coupler
- Connects to Battery Single Point Watering Systems (BFS, Aquapro & other major brands)
- Inbuilt Strainer: Non-clogging design uses centrifugal flow to keep contaminants out
- Inbuilt Flow indicator: Easy to see bright yellow balls
