

WaterGenius - Automated Battery Watering

WaterGenius automatically delivers the correct volume of water to the battery at the conclusion of charging via the batteries Single Point Watering Kit.

- Designed and manufactured in Australia
- Increases battery life by ensuring your wet cell lead acid battery has the correct water level at all times
- Will save your business thousands of dollars in labour costs
- Reduces OH&S risks
- Compatible with all brands and models of lead acid battery chargers
- Tried, tested and proven technology with thousands of units in use in Australian Warehouses, DC's and Battery Rooms
- Suitable for all voltages and sizes of flooded lead acid batteries
- Fully automated battery watering, simply:
 - Position battery on it's charging rack
 - Plug in the charger
 - Connect the water coupler
 - Walk away
 - A fully charged and correctly watered battery will be ready for the start of your next shift.
