

60 Litre Water Cart with Electric Pump

A light weight and portable Water Cart with an electric pump, powered by an onboard rechargeable battery. The 60L Water Cart is a convenient method to quickly and easily water your forklift lead acid batteries after charging.

USER INSTRUCTIONS

1. Fully charge the integrated Lithium Ion Battery by connecting the supplied Battery Charger into the port on the Top Cap. Once charge complete, disconnect.
2. Unscrew Top Cap, fill Water Tank with Distilled water or Deionised Water and screw Top Cap back in position.

CAUTION: Ensure battery has completed charging before topping up water

3. Wheel Cart into position adjacent to Forklift Battery.
4. Connect to your batteries Single Point Watering System with the included hose and coupler of the Water Cart.
5. Switch on the Pump using the orange button located on the Top Cap and water will flow into your battery until the floats of the battery watering system rise to their closed position shutting off the water flow into the battery.

CAUTION: Turn off the Pump as soon as the yellow flow indicator balls in the coupler stop spinning

6. Switch off the pump, disconnect the coupler and wheel the Water Cart away

60 Litre Water Cart with Electric Pump

SPECIFICATIONS

Water Tank

- 60 Litre Capacity
- 71mm opening for quick refilling
- Integrated pump and battery housing
- Splash proof charge point

Trolley

- Powder Coated Metal Trolley
- 125mm Solid Rubber Wheels

Battery & Charger

- Fast charging thanks to Lithium technology
- On board 10.8 Volt 6.7 Amp Hour Lithium Battery
- 12.6 Volt 1 Amp Charger with 240V Plug

Water Pump

- 12 Volt 2.1 Amp Comet 'Elegant' Pump made in Germany
- Flow rate: 20 litres per minute

Water Connection

- Includes hose and Push / Pull quick release Coupler
- Connects to Battery Single Point Watering Systems (BFS, Aquapro & other major brands)
- Inbuilt Strainer: Non-clogging design uses centrifugal flow to keep contaminants out
- Inbuilt Flow indicator: Easy to see bright yellow balls
